

Guosong Yang

Department of Electrical and Computer Engineering
Rutgers University–New Brunswick
94 Brett Road, Piscataway, NJ 08854 USA

✉ guosong.yang@rutgers.edu ☎ +1 (848) 445-5247 🌐 guosong-yang.github.io

RESEARCH INTERESTS

Systems and Control Theory; Switched and Hybrid Systems; Control with Limited Information; Non-convex Optimization; Game-Theoretic Learning; Cyber-Physical Systems; System Resilience and Security.

POSITIONS

- | | |
|--|--------------------|
| Rutgers University–New Brunswick , Piscataway, NJ, USA | Sep. 2022–present |
| <i>Assistant Professor</i> , Department of Electrical and Computer Engineering | |
| University of Illinois at Urbana-Champaign , Urbana, IL, USA | May 2022–Aug. 2022 |
| <i>Postdoctoral Research Associate</i> , Coordinated Science Laboratory | |
| Advisor: Daniel Liberzon | |
| University of California, Santa Barbara , Santa Barbara, CA, USA | Aug. 2017–May 2022 |
| <i>Postdoctoral Scholar</i> , Center for Control, Dynamical Systems, and Computation | |
| Advisor: João P. Hespanha | |

EDUCATION

- | | |
|---|---------------------|
| University of Illinois at Urbana-Champaign , Urbana, IL, USA | Oct. 2013–Jul. 2017 |
| <i>Doctor of Philosophy</i> in Electrical and Computer Engineering | |
| Dissertation: “Switched and hybrid systems with inputs: Small-gain theorems, control with limited information, and topological entropy” | |
| Advisor: Daniel Liberzon | |
| University of Illinois at Urbana-Champaign , Urbana, IL, USA | Aug. 2011–Aug. 2013 |
| <i>Master of Science</i> in Electrical and Computer Engineering | |
| Thesis: “A Lyapunov-based small-gain theorem for interconnected switched systems” | |
| Advisor: Daniel Liberzon | |
| Hong Kong University of Science and Technology , Kowloon, Hong Kong | Sep. 2007–Jun. 2011 |
| <i>Bachelor of Engineering</i> in Electronic Engineering (First Class Honors), minor in Mathematics | |
| Advisor: Zexiang Li | |

AWARDS AND HONORS

- | | |
|------|--|
| 2019 | <i>ACM SIGBED HSCC Best Paper Award</i> , 22nd ACM International Conference on Hybrid Systems: Computation and Control, Montreal, Canada |
| 2016 | <i>Best Poster Award</i> , 11th Coordinated Science Laboratory Student Conference, University of Illinois at Urbana-Champaign, Urbana, IL, USA |

Working papers

- [W4] Zhenghao Li and Guosong Yang, “Data-driven control of linear systems using quantized data,” submitted for conference publication
- [W3] Mahmoud Zamani and Guosong Yang, “Input-to-state stabilization of linear systems under data-rate constraints,” submitted for journal publication
- [W2] Guosong Yang and Daniel Liberzon, “Topological entropy of nonlinear time-varying systems,” submitted for journal publication
- [W1] Guosong Yang, Radha Poovendran, and João P. Hespanha, “Adaptive learning in two-player Stackelberg games with application to network security,” submitted for journal publication

Journals

- [C3] Guosong Yang and Daniel Liberzon, “Stabilizing a switched linear system with disturbance by sampled-data quantized feedback,” in *2015 American Control Conference*, Chicago, IL, USA, Jul. 2015, pp. 2193–2198
- [C2] Guosong Yang and Daniel Liberzon, “Input-to-state stability for switched systems with unstable subsystems: A hybrid Lyapunov construction,” in *53rd IEEE Conference on Decision and Control*, Los Angeles, CA, USA, Dec. 2014, pp. 6240–6245
- [C1] Andrii Mironchenko, Guosong Yang, and Daniel Liberzon, “Lyapunov small-gain theorems for not necessarily ISS hybrid systems,” in *21st International Symposium on Mathematical Theory of Networks and Systems*, Groningen, Netherlands, Jul. 2014, pp. 1001–1008

GRANT-APPLICATION EXPERIENCE

- Coauthor of the National Science Foundation grant CMMI-1662708: “Switched control systems with limited information: An entropy approach to stabilization and disturbance attenuation,” Jul. 2017–Jun. 2020, Award: \$349,540, PI: Daniel Liberzon

PRESENTATIONS AND SEMINARS

1. “Topological entropy of nonlinear time-varying Systems,” in *2026 Information Theory and Applications Workshop*, San Diego, CA, USA, Feb. 2026 (invited talk)
2. “On topological entropy of switched cascade systems,” in *60th Annual Allerton Conference on Communication, Control, and Computing*, Urbana, IL, USA, Sep. 2024 (invited talk)
3. “Adaptive learning in two-player Stackelberg games with application to network security,” in *2024 Joint Statistical Meetings*, Portland, OR, USA, Aug. 2024 (invited talk)
4. “Networked cyber-physical systems: Information and control,” in *e-TEC Talks @SNU Summer 2021*, Seoul National University, Aug. 2021 (invited virtual seminar)
5. “Topological entropy of switched nonlinear systems,” in *24th ACM International Conference on Hybrid Systems: Computation and Control*, May 2021 (virtual talk)
6. “Information and control in networked cyber-physical systems,” in *2020 Information Theory and Applications Workshop*, San Diego, CA, USA, Feb. 2020 (invited talk)
7. “Adaptive learning in two-player Stackelberg games with continuous action sets,” in *37th Southern California Control Workshop*, University of California, San Diego, San Diego, CA, USA, Jan. 2020
8. “On topological entropy and stability of switched linear systems,” in *22nd ACM International Conference on Hybrid Systems: Computation and Control*, Montreal, Canada, Apr. 2019
9. “On topological entropy of switched linear systems with diagonal, triangular, and general matrices,” in *57th IEEE Conference on Decision and Control*, Miami Beach, FL, USA, Dec. 2018
10. “On topological entropy of switched linear systems,” in *35th Southern California Control Workshop*, University of California, Los Angeles, Los Angeles, CA, USA, Nov. 2018

11. “On topological entropy of switched linear systems with pairwise commuting matrices,” in *56th Annual Allerton Conference on Communication, Control, and Computing*, Monticello, IL, USA, Oct. 2018 (invited talk)
12. “Modeling and mitigating the Coremelt attack,” in *2018 American Control Conference*, Milwaukee, WI, USA, Jun. 2018
13. “Stabilization of interconnected switched control-affine systems via a Lyapunov-based small-gain approach,” in *2017 American Control Conference*, Seattle, WA, USA, May 2017
14. “Analysis of different Lyapunov function constructions for interconnected hybrid systems,” in *55th IEEE Conference on Decision and Control*, Las Vegas, NV, USA, Dec. 2016 (invited talk)
15. “Feedback stabilization of a switched linear system with unknown disturbance under data-rate constraints,” in *CCDC Seminar Series*, Center for Control, Dynamical Systems, and Computation, University of California, Santa Barbara, Santa Barbara, CA, USA, Nov. 2016 (invited seminar)
16. “Finite data-rate stabilization of a switched linear system with unknown disturbance,” in *10th IFAC Symposium on Nonlinear Control Systems*, Monterey, CA, USA, Aug. 2016
17. “Stabilizing a switched linear system with unknown disturbance by sampled and quantized state feedback,” in *11th Coordinated Science Laboratory Student Conference*, University of Illinois at Urbana-Champaign, Urbana, IL, USA, Feb. 2016 (poster presentation, **Best Poster Award winner**)
18. “Stabilizing a switched linear system with disturbance by sampled-data quantized feedback,” in *2015 American Control Conference*, Chicago, IL, USA, Jul. 2015
19. “Input-to-state stability for switched systems with unstable subsystems: A hybrid Lyapunov construction,” in *53rd IEEE Conference on Decision and Control*, Los Angeles, CA, USA, Dec. 2014
20. “A Lyapunov-based small-gain theorem for interconnected switched systems,” in *2nd Midwest Workshop on Control and Game Theory*, University of Notre Dame, Notre Dame, IN, USA, Apr. 2013

TEACHING

Rutgers University–New Brunswick, Piscataway, NJ, USA

- 16:332:541 Stochastic Signals and Systems
- 16:332:519 Modeling and Control of Cyber-Physical Systems
- 16:332:512 Nonlinear and Adaptive Control
- 14:332:345 Linear Systems and Signals
- 14:332:226 Probability and Random Processes

SERVICE TO THE PROFESSION

Journal review

- *IEEE Transactions on Automatic Control*
- *Automatica*
- *Nonlinear Analysis: Hybrid Systems*
- *System & Control Letters*

- *IEEE Transactions on Control of Network Systems*
- *IEEE Control Systems Letters*
- *Communications in Nonlinear Science and Numerical Simulation*
- *Mathematics of Control, Signals, and Systems*

Conference review

- *American Control Conference*
- *IEEE Conference on Decision and Control*
- *IFAC World Congress*
- *IFAC Workshop on Distributed Estimation and Control in Networked Systems*
- *ACM International Conference on Hybrid Systems: Computation and Control*
- *IFAC Conference on Modelling, Identification and Control of Nonlinear Systems*

Conference organization

- Program Committee for *28th ACM International Conference on Hybrid Systems: Computation and Control*, May 2025
- Repeatability Evaluation Program Committee for *26th ACM International Conference on Hybrid Systems: Computation and Control*, May 2023
- Repeatability Evaluation and Posters and Demos Program Committees for *25th ACM International Conference on Hybrid Systems: Computation and Control*, May 2022
- Repeatability Evaluation and Posters and Demos Program Committees for *24th ACM International Conference on Hybrid Systems: Computation and Control*, May 2021
- Session chair for “Switched Systems I” in *57th IEEE Conference on Decision and Control*, Miami Beach, FL, USA, Dec. 2018
